WORLD TRIATHLON DEVELOPMENT WEBINARS
STARTING SOON
Returning to events under the "new normality": General provisions, event risk assessments and medical provisions
• Introduction

• Series of webinars

• Housekeeping

• Q & A
General

• The need of guidelines – Triathlon is considered as a moderate risk sport (NEW UPDATED VERSION AVAILABLE)

• Medical Task Force among endurance sports’ IFs
Approach

• Work with your public health authorities

• It is important what ever you do, to do it right

• No more than necessary (required) and no less than essential

• Assess the risk of every area of your race (venue and competition)

• Produce the concept paper

• Decide how many participants you can safely host at your race vs. how you can host safely your estimated participation numbers

• Share best practices
• Panel discussion
WHO Risk Assessment and Mitigation Checklist for Mass Gatherings

- World Triathlon strongly recommends the use of the WHO risk assessment tool by everyone

- World Triathlon advises you to conduct the event only if it falls in Very Low or Low risk category

- No such a thing as “zero” risk event

- WHO’s mass gathering technical guidance and tools
Online risk-assessment tool for endurance event organisers

- Outbreak Prevention Task Force formed by World Athletics with the International Institute for Race Medicine (IIRM), and including the medical chairs of World Triathlon and four further global sports federations.

- The tool is intended to help organisers assess the risk of staging an event, establish the preparedness of the community and the event organisation for the risks of Covid-19, and clarify any necessary steps to further mitigate and reduce the risk.

The tool is available at: idom.worldathletics.org
Panel discussion
Individual’s responsibility

- WHO Recommendations

- ITU Medical Guidelines for International Athletes, Team Coaches, TOs and Staff
Medical provisions and recommendations to the event organisers

• WHO Mitigation list

• World Triathlon COVID-19 Outbreak - Guidelines for RMDs and MDs
  https://www.triathlon.org/about/downloads/category/medical
Participants’ health screening

• Pre-Travel and Pre-Event Health Checks

• Pre-Travel Medical Certificate

• Pre event questionnaire & health screening (temperature check)
Use of mask/mouth-nose face covering and rubber/disposable gloves

• World Triathlon strongly recommends the use of masks/mouth-nose face covering for officials and other accredited clients that are in contact with athletes (e.g. registration, transition zone, start area, post finish area). The use of face shields is strongly advised in areas with high risk, such as the finish line.

• Athletes are advised to wear masks/mouth-nose face covering during any non-competition activity (e.g. registration, race package distribution/race package pick up).

• The use of rubber/disposable gloves is strongly recommended for the volunteers assigned to the finish area, classifiers and medical staff.

• Please be reminded when wearing rubber/disposable gloves and masks/mouth-nose face covering you still need to disinfect.
• Panel discussion
